Community Wildfire Protection Plan
An Action Plan for Wildfire Mitigation and Conservation of Natural Resources

Columbia County

May 1, 2009
The following report is a collaborative effort among various entities; the representatives listed below comprise the core decision-making team responsible for this report and mutually agree on the plan’s contents:

Pam Tucker  
Columbia County EMA Director  
(706) 868-3303  
ptucker@columbiacountyga.gov

Suzie Hughes  
Administrative Specialist Columbia EMA  
(706) 868-3303  
shughes@columbiacountyga.gov

Steve Abbott  
Chief Ranger, Columbia Co Forestry Unit  
(706) 556-3962  
sabbott@gfc.state.ga.us

Mark Munns  
District Ranger Washington District  
(706) 678-2015  
mmunns@gfc.state.ga.us

Doug Cooper  
Chief Martinez – Columbia Fire & Rescue  
(706) 831-1498  
chiefcooper@mvfd.net

Brent Willis  
Capt. Martinez – Columbia Fire & Rescue  
(706) 863-7745  
bwillis@mvfd.net

Chuck Meadows

VII. Prioritized Mitigation Recommendations .................................................................................. 12

VIII. Action Plan .................................................................................................................................. 16

IX. Wildfire Pre-Suppression Plan .................................................................................................... Appended
I. OBJECTIVES

The mission of the following report is to set clear priorities for the implementation of wildfire mitigation in Columbia County. The plan includes prioritized recommendations for the appropriate types and methods of fuel reduction and structure ignitability reduction that will protect this community and its essential infrastructure. It also includes a plan for wildfire suppression. Specifically, the plan includes community-centered actions that will:

- Educate citizens on wildfire, its risks, and ways to protect lives and properties,
- Support fire rescue and suppression entities,
- Focus on collaborative decision-making and citizen participation,
- Develop and implement effective mitigation strategies, and
- Develop and implement effective community ordinances and codes.

II. COMMUNITY COLLABORATION

An initial meeting was held on December 17th 2008 at the Columbia County EMA Department attended by the following core planning team:

- Will Fell: GFC CWPP Specialist
- Steve Abbott: GFC Chief Ranger Columbia County
- Mark Munns: GFC Dist Ranger Dist 3
- Doug Cooper: Fire Chief Martinez – Columbia Fire & Rescue
- Pam Tucker: Columbia County EMA Director
- Suzie Hughes: Admin Spec Columbia County EMA
- Wayne Kent: Captain Grovetown DPS
- Brett Willis: Captain Martinez – Columbia Fire & Rescue
- Chuck Meadows: Interim Dir Harlem DPS

After an initial discussion of the processes and goals we hope to accomplish with this report, it was decided that we would define areas within the wildland urban interface. At the completion of this we would reconvene and discuss and evaluate the completed community wildfire risk assessments. It was further decided that we would provide for mitigation recommendations for the cities of Harlem and Grovetown and the suburban unincorporated areas of Evans and Martinez and the rural areas of the county. The chiefs of the area fire departments in the county assessed their districts and reconvened in February for the purpose of completing the following:

- Risk Assessment: Assessed wildfire hazard risks and prioritized mitigation actions.
- Fuels Reduction: Identified strategies for coordinating fuels treatment projects.
- Structure Ignitability: Identified strategies for reducing the ignitability of structures within the Wildland interface.
- Emergency Management: Forged relationships among local government and fire districts and developed/refined a pre-suppression plan.
- Education and Outreach: Developed strategies for increasing citizen awareness and action and to conduct homeowner and community leader workshops.
III. COMMUNITY BACKGROUND AND EXISTING SITUATION

Background

Columbia County lies along the Savannah River in east central Georgia, bordering South Carolina just northwest of Augusta. It was created by an act of the state legislature from a northern part of Richmond County on December 10, 1790. In the colonial era the territory that constitutes Columbia County was laid out as part of St. Paul Parish. Named for explorer Christopher Columbus, the county was created in response to a request by backcountry settlers that they be given court sessions that would be more convenient than those held in Augusta.

Columbia County provided several leaders in national affairs. Of the six delegates appointed to attend the constitutional convention in Philadelphia, Pennsylvania, in 1787, William Few Jr. and Abraham Baldwin were from the portion of Richmond County that became Columbia. Few and Baldwin were the only two Georgia delegates who signed to ratify the Constitution of the United States. Both later served in the U.S. Senate, Baldwin as president pro tempore under U.S. president Thomas Jefferson.

The earliest village in the county—Brandon—was founded around 1752. Brandon was abandoned sometime in the mid-1750s, although it appears on a 1779 map. The Quaker town of Wrightsborough was built on the same site in the 1760s, and William Bartram recorded a visit to that town in 1773.

Both the oldest Baptist church in the state, Kiokee (established in 1772), and the third oldest, Abilene (established in 1774), were founded in what became Columbia County.

There are more than thirty prehistoric sites in Columbia County. The most important, on Stallings Island, is a burial mound documenting a culture that flourished in the Archaic Period more than 4,000 years ago.

After the Georgia Railroad was laid through the county around 1834-36, new communities, such as the incorporated cities of Harlem and Grovetown, sprang up or began to flourish. The current county seat, Appling, was chartered in 1816 and was named for Colonel Daniel Appling, a War of 1812 (1812-15) hero from the Columbia County area. Appling is one of many inactive municipalities that lost their incorporated status by an act of the Georgia General Assembly in 1993.

In the 1850s thousands of acres in Columbia County were cotton plantations. Census records show that the county had a slave population of nearly 8,300, more than twice the white population.

Columbia today is a bustling, fast-growing suburban county. According to the 2000 U.S. census, its population is 89,288 (82.7 percent white, 11.2 percent black, and 2.6 percent Hispanic). The county is economically diverse, with service, education, and health-related businesses as its major industries. (Courtesy New Georgia Encyclopedia)
Existing Situation

While Columbia County has in the past several decades become a rapidly growing suburban county with an estimated population of over 106,000, 66% of the land area still remains forested. There are large blocks of wildland remaining in the northern and western quadrants of the county. There is also suburban growth in the rapidly expanding suburbs of Augusta concentrated in the southeastern and central part of the county along with many homes and communities being built in traditionally forested areas of the county. This situation along with the many lake homes and communities nestled along the shores of Clark Hill Lake add to the growing concern among fire service agencies about the risks and hazards of protecting homes and infrastructure within the widening Wildland Urban Interface.

Columbia County is well protected by three organized fire departments. The Harlem Department of Public Safety covers the city of Harlem and the Grovetown Department of Public Safety covers the city of Grovetown and a small area of the county just to the south, each with two stations within their respective jurisdictions. The remainder of the county is covered by Martinez – Columbia County Fire and Rescue with 16 stations well distributed throughout the unincorporated area county, 14 of which are staffed around the clock. The Georgia Forestry Commission maintains a unit with wildland fire suppression capability centered in the county.

While there are modern pressurized water systems available in the two incorporated cities and much of the suburban areas of Evans and Martinez, there is still a significant area outside these regions lacking ready access to hydrants and dependable water sources.

Over the past fifty years, Columbia County has averaged about 46 reported wildland fires per year and almost half of these have occurred during the months of February, March and April. These fires have burned an average of 169 acres annually. Of this annual acreage burned, 58% was lost during the above three months. Since the advent of the outdoor burning permit law about 20 years ago, the numbers of fires have decreased over the years as perhaps more residential areas have replaced wildland areas and the populace has become more cautious in their burning practices.

The leading causes of these fires over the past 20 years, was debris burning causing 42% of the fires and 39% of the acres burned. Children were the next leading cause with 12% of the fires and 10% of the acres lost. More detailed records over the past five years show that almost 50% of these debris fires originated from escapes from household or residential debris burning.

Georgia Forestry Commission Wildfire Records show that in the past five years, four homes have been lost or damaged by wildfire in Columbia County resulting in estimated losses of $32,500 along with seven outbuildings valued at $24,600. According to reports during this period 174 homes have been directly or indirectly threatened by these fires. Additionally three vehicles valued at $8,000 and ten pieces of other mechanized equipment suffered damages estimated at $66,700. This is a significant loss of non timber property attributed to wildfires in Columbia County.

V. COMMUNITY WILDFIRE RISK ASSESSMENT

The Wildland-Urban Interface

There are many definitions of the Wildland-Urban Interface (WUI), however from a fire management perspective it is commonly defined as an area where structures and other human development meet or intermingles with undeveloped wildland or vegetative fuels. As fire is dependent on a certain set of conditions, the National Wildfire Coordinating Group has defined the wildland-urban interface as a set of conditions that exists in or near areas of wildland fuels, regardless of ownership. This set of conditions includes type of vegetation, building construction, accessibility, lot size, topography and other factors such as weather and humidity. When these conditions are present in certain combinations, they make some communities more vulnerable to wildfire damage than others. This “set of conditions” method is perhaps the best way to define wildland-urban interface areas when planning for wildfire prevention, mitigation, and protection activities.

There are three major categories of wildland-urban interface. Depending on the set of conditions present, any of these areas may be at risk from wildfire. A wildfire risk assessment can determine the level of risk.

1. “Boundary” wildland-urban interface is characterized by areas of development where homes, especially new subdivisions, press against public and private wildlands, such as private or commercial forest land or public forests or parks. This is the classic type of wildland-urban interface, with a clearly defined boundary between the suburban fringe and the rural countryside.

2. “Intermix” wildland-urban interface areas are places where improved property and/or structures are scattered and interspersed in wildland areas. These may be isolated rural homes or an area that is just beginning to go through the transition from rural to urban land use.

3. “Island” wildland-urban interface, also called occluded interface, are areas of wildland within predominately urban or suburban areas. As cities or subdivisions grow, islands of undeveloped land may remain, creating remnant forests. Sometimes these remnants exist as parks, or as land that cannot be developed due to site limitations, such as wetlands. (courtesy Fire Ecology and Wildfire Mitigation in Florida 2004)
As it was felt there was considerable variation in risk from one end of the county to the other, it was decided by the CORE assessment team to assess each of the two incorporated jurisdictions separately along with dividing the unincorporated area of the county into the largely suburban Martinez – Evans area which is well serviced with a modern pressurized water system and the more rural western and northern sections with either pressurized water located only on the main roads or non existent.

The wildland fire risk assessments were conducted in early 2009 by the various Columbia County Fire Departments and returned an average score of 82, placing Columbia County overall in the “low moderate” hazard range. The assessments ranged from minimal risk in the Evans – Martinez area to high risk in the rural north and western areas of the county. See the assessed factors and the summary of the assessments following.

The risk assessment instrument used to evaluate wildfire hazards to Columbia County’s WUI was the Woodland Community Wildfire Hazard Risk Assessment Checklist. The instrument takes into consideration accessibility, vegetation (based on fuel models), topography, roofing assembly, building construction, and availability of fire protection resources, placement of gas and electric utilities, and additional rating factors. The following factors contributed to the wildfire hazard score for the various sections of Columbia County:

Evans Martinez Suburban Area (Low Risk);
- Sections of grown up wildland fuels within developed areas
- Lack of firewise construction and landscaping in some areas

City of Grovetown and adjacent subscription Area (Moderate Risk);
- Lack of defensible space in wildland interface areas.
- Lack of firewise construction and landscaping in some areas
- Large, adjacent areas of forest or wildlands
- Sections of grown up wildland fuels within developed areas.

City of Harlem (Moderate Risk)
- Long, narrow, and poorly labeled driveways
- Lack of defensible space in wildland interface areas.
- Lack of firewise construction and landscaping in some areas
- Large, adjacent areas of forest or wildlands
- High occurrence of wildfires in the several locations.
- Equipment to respond to off road situations.
Rural Unincorporated North and Western Columbia (High Risk)
- One way in and out in many communities.
- Addresses to homes not clearly marked.
- Long narrow driveways inaccessible to equipment.
- Thick, highly flammable vegetation surrounding many homes
- Minimal defensible space around structures
- Homes with wooden siding and roofs with heavy accumulations of vegetative debris.
- No pressurized or non-pressurized water systems available off major roads
- Dry hydrants and drafting sources unusable.
- Above ground utilities
- Large, adjacent areas of forest or wildlands
- Undeveloped lots comprising half the total lots in many rural communities.
- High occurrence of wildfires in the several locations
- Dead end roads with inadequate turn arounds

VII. PRIORITIZED MITIGATION RECOMMENDATIONS

Executive Summary
The following recommendations were developed by the Columbia County CWPP Core team as a result of surveying and assessing fuels and structures and by conducting meetings and interviews with county and city officials. A priority order was determined based on which mitigation projects would best reduce the hazard of wildfire in the assessment area.

Proposed Community Hazard and Structural Ignitability Reduction Priorities

<table>
<thead>
<tr>
<th>Treatment Area</th>
<th>Treatment Types</th>
<th>Treatment Method(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. All Structures</td>
<td>Create minimum of 30-feet of defensible space**</td>
<td>Educate homeowners to trim shrubs and vines to 30 feet from structures, trim overhanging limbs, replace flammable plants near homes with less flammable varieties, remove vegetation around chimneys.</td>
</tr>
<tr>
<td>2. Applicable Structures</td>
<td>Reduce structural ignitability**</td>
<td>Educate owners to clean flammable vegetative material from roofs and gutters, store firewood appropriately, install skirting around raised structures, store water hoses for ready access, replace pine straw and mulch around plantings with less flammable landscaping materials.</td>
</tr>
<tr>
<td>3. Community Clean-up Day</td>
<td>Cutting, mowing, pruning**</td>
<td>Work with Homeowners Associations to encourage to cut, prune, and mow vegetation in shared community spaces where needed.</td>
</tr>
<tr>
<td>4. Road Signage</td>
<td>At Replacement</td>
<td>New road signage with minimum 4 inch reflective lettering on non flammable poles. Dead end (no outlet or turn-around) should be prominently tagged.</td>
</tr>
<tr>
<td>5. Road Access</td>
<td>Identify needed road improvements</td>
<td>As roads are upgraded, widen to minimum standards with at least 50 foot diameter cul de sacs.</td>
</tr>
<tr>
<td>6. Subdivision Access</td>
<td>Alternate exits</td>
<td>Work with developers to identify and create alternate access and exits routes to subdivisions and communities with only one way in and out.</td>
</tr>
</tbody>
</table>
7. Codes and Ordinances | Examine existing codes and ordinances. | Amend and enforce existing building codes as they relate to skirting, propane tank locations, public nuisances (trash/debris on property), Property address marking standards and other relevant concerns. As zoning, planning and subdivision ordinances are updated include fire department and emergency services input in the design of these.

### Proposed Community Wildland Fuel Reduction Priorities

<table>
<thead>
<tr>
<th>Treatment Area</th>
<th>Treatment Types</th>
<th>Treatment Method(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Adjacent WUI Lands</td>
<td>Reduce hazardous fuels</td>
<td>Encourage prescribed burning for private landowners and industrial timberlands particularly adjacent to residential areas.</td>
</tr>
<tr>
<td>2. Corps of Engineer Lands</td>
<td>Reduce hazardous fuels</td>
<td>Enter into discussion with CoE land management on fuel reduction activities adjacent to residential areas.</td>
</tr>
<tr>
<td>3. Existing Fire Lines</td>
<td>Reduce hazardous fuels</td>
<td>Clean and re-harrow existing lines.</td>
</tr>
</tbody>
</table>

### Proposed Improved Community Wildland Fire Response Priorities

<table>
<thead>
<tr>
<th>Treatment Area</th>
<th>Treatment</th>
<th>Method</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Water Sources</td>
<td>Dry Hydrants</td>
<td>Inspect, maintain and improve access to existing dry hydrants. Add signage along road to mark the hydrants.</td>
</tr>
</tbody>
</table>

**Actions to be taken by homeowners and community stakeholders**
Proposed Education and Outreach Priorities

<table>
<thead>
<tr>
<th>1. Conduct “How to Have a Firewise Home” Workshop for Columbia County Residents</th>
</tr>
</thead>
<tbody>
<tr>
<td>Set up and conduct a workshop for homeowners that teach the principles of making homes and properties safe from wildfire. Topics for discussion include defensible space, landscaping, building construction, etc. Workshop will be scheduled for evenings or weekends when most homeowners are available and advertised through local media outlets. Distribute materials promoting firewise practices and planning through local community and governmental meetings.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>2. Conduct “Firewise” Workshop for Community Leaders</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arrange for GFC Firewise program to work with local community leaders and governmental officials on the importance of “Firewise Planning” in developing ordinances and codes as the county as the need arises. Identify “Communities at Risk” within the county for possible firewise community recognition.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>3. Spring Clean-up Event</th>
</tr>
</thead>
</table>
| Conduct clean-up event every spring involving the Georgia Forestry Commission, Grovetown, Harlem and Martinez - Columbia County Fire Departments and community residents. Set up information table with educational materials and refreshments. Initiate the event with a morning briefing by GFC Firewise coordinator and local fire officials detailing plans for the day and safety precautions. Activities to include the following:  
  - Clean flammable vegetative material from roofs and gutters  
  - Trim shrubs and vines to 30 feet away from structures  
  - Trim overhanging limbs  
  - Clean hazardous or flammable debris from adjacent properties  
Celebrate the work with a community cookout, with Community officials, GFC and Grovetown, Harlem and Martinez - Columbia County Fire Departments discussing and commending the work accomplished. |

<table>
<thead>
<tr>
<th>4. Informational Packets</th>
</tr>
</thead>
</table>
| Develop and distribute informational packets to be distributed by permitting authorities, code enforcement, realtors and insurance agents. Included in the packets are the following:  
  - Be Firewise Around Your Home  
  - Firewise Guide to Landscape and Construction  
  - Firewise Communities USA Bookmarks |
5. **Wildfire Protection Display**

Create and exhibit a display for the general public at the various fire stations rotating around during fire prevention month. Display can be independent or combined with the Georgia Forestry Commission display.

6. **Local Press**

Invite the Columbia County News - Times and the Augusta Chronicle to community “Firewise” functions for news coverage and regularly submit press releases documenting wildfire risk improvements in Columbia County.

7. **Columbia County Website**

Create a community Firewise Page on the Columbia County Website. Publish the Columbia County Community Wildfire Protection Plan on the county’s website and establish links to Firewise websites to provide easy access for homeowners to access this information.
VIII. ACTION PLAN

Roles and Responsibilities
The following roles and responsibilities have been developed to implement the action plan:

<table>
<thead>
<tr>
<th>Role</th>
<th>Responsibility</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hazardous Fuels and Structural Ignitability Reduction</td>
<td>Create this informal team or council comprised of residents, GFC officials, Grovetown, Harlem and Martinez - Columbia County Fire Department officials, a representative from the cities and county governments and the EMA Director for Columbia County. Meet periodically to review progress towards mitigation goals, appoint and delegate special activities, work with federal, state, and local officials to assess progress and develop future goals and action plans. Work with residents to implement projects and firewise activities.</td>
</tr>
</tbody>
</table>

| Key Messages to focus on | 1 Defensible Space and Firewise Landscaping  
2 Debris Burning Safety  
3 Firewise information for homeowners  
4 Prescribed burning benefits |
| Communications objectives | 1 Create public awareness for fire danger and defensible space issues  
2 Identify most significant human cause fire issues  
3 Enlist public support to help prevent these causes  
4 Encourage people to employ fire prevention and defensible spaces in their communities. |

| Target Audiences | 1 Homeowners  
2 Forest Landowners and users  
3 Civic Groups  
4 School Groups |
| Methods | 1 News Releases  
2 Personal Contacts  
3 Key messages and prevention tips  
4 Visuals such as signs, brochures and posters |
### Spring Clean-up Day

<table>
<thead>
<tr>
<th>Role</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Event Coordinator</td>
<td>Coordinate day’s events and schedule, catering for cookout, guest attendance, and moderate activities the day of the event.</td>
</tr>
<tr>
<td>Event Treasurer</td>
<td>Collect funds from residents to cover food, equipment rentals, and supplies.</td>
</tr>
<tr>
<td>Publicity Coordinator</td>
<td>Advertise event through neighborhood newsletters, letters to officials, and public service announcements (PSAs) for local media outlets. Publicize post-event through local paper and radio PSAs.</td>
</tr>
<tr>
<td>Work Supervisor</td>
<td>Develop volunteer labor force of community residents, develop labor/advisory force from Georgia Forestry Commission, Grovetown, Harlem and Martinez - Columbia County Fire Departments, and Emergency Management Agency. Procure needed equipment and supplies. In cooperation with local city and county officials, develop safety protocol. Supervise work and monitor activities for safety the day of the event.</td>
</tr>
</tbody>
</table>

### Funding Needs

The following funding is needed to implement the action plan:

<table>
<thead>
<tr>
<th>Project</th>
<th>Estimated Cost</th>
<th>Potential Funding Source(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Create a minimum of 30 feet of defensible space around structures</td>
<td>Varies</td>
<td>Residents will supply labor and fund required work on their own properties.</td>
</tr>
<tr>
<td>2. Reduce structural ignitability by cleaning flammable vegetation from roofs and gutters, appropriately storing firewood, installing skirting around raised structures, storing water hoses for ready access, and using firewise landscaping around homes</td>
<td>Varies</td>
<td>Residents will supply labor and fund required work on their own properties.</td>
</tr>
<tr>
<td>3. Amend codes and ordinances to provide better driveway access, increased visibility of house numbers, properly stored firewood, minimum defensible space brush clearance, required Class A roofing materials and skirting around raised structures, planned maintenance of community lots.</td>
<td>No Cost</td>
<td>To be adopted by city and county governments as needed.</td>
</tr>
<tr>
<td>4. Spring Cleanup Day</td>
<td>Varies</td>
<td>Community Business Donations.</td>
</tr>
<tr>
<td>5. Fuel Reduction Activities</td>
<td>$15 / Acre</td>
<td>FEMA &amp; USFS Grants</td>
</tr>
</tbody>
</table>
POTENTIAL FUNDING SOURCES:
As funding is questionable in these times of tight government budgets and economic uncertainty, unconventional
means should be identified whereby the need for funding can be reduced or eliminated.
Publications / Brochures –
- FIREWISE materials are available for cost of shipping only at www.firewise.org.
- Another source of mitigation information can be found at www.nfpa.org.
- Access to reduced cost or free of charge copy services should be sought whereby publications can reproduced.
- Free of charge public meeting areas should be identified where communities could gather to be ed regarding prevention and firewise principles.
Mitigation –
- Community Protection Grant:
  - USFS sponsored prescribed burn program. Communities with at risk properties that lie wi of the USFS border may apply with the GFC to have their forest land prescribed burned fre
- FEMA Mitigation Policy MRR-2-08-01: through GEMA - Hazard Mitigation Grant Program (HMGP) : Disaster Mitigation (PDM)
  - To provide technical and financial assistance to local governments to assist in the implem long term cost effective hazard mitigation measures.
  - This policy addresses wildfire mitigation for the purpose of reducing the threat to all-risk s through creating defensible space, structural protection through the application of ignitio construction, and limited hazardous fuels reduction to protect life and property.
  - With a complete and registered plan (addendum to the State plan) counties can apply for mitigation funding. They will also be eligible for HMGP if the county is declared under a w disaster.
- GFC - Plowing and burning assistance can be provided through the Georgia Forestry Commission a: option for mitigation efforts.
- Individual Homeowners –
  - In most cases of structural protection ultimately falls on the responsibility of the commun homeowner. They will bear the cost; yet they will reap the benefit from properly implem mitigation efforts.
  - GEMA Grant - PDM (See above)

Ultimately it is our goal to help the communities by identifying the communities threatened with a high risk t and educate those communities on methods to implement on reducing those risks.
Assessment Strategy
To accurately assess progress and effectiveness for the action plan, the Columbia County WUI Fire Council will implement the following:

- Annual wildfire risk assessment will be conducted to re-assess wildfire hazards and prioritize needed actions.
- Mitigation efforts that are recurring (such as mowing, burning, clearing of defensible space) will be incorporated into an annual renewal of the original action plan.
- Mitigation efforts that could not be funded in the requested year will be incorporated into the annual renewal of the original action plan.
- Continuing educational and outreach programs will be conducted and assessed for effectiveness. Workshops will be evaluated based on attendance and post surveys that are distributed by mail 1 month and 6 months following workshop date.
- The Columbia County WUIFC will publish an annual report detailing mitigation projects initiated and completed, progress for ongoing actions, funds received, funds spent, and in-kind services utilized. The report will include a “state of the community” section that critically evaluates mitigation progress and identifies areas for improvement. Recommendations will be incorporated into the annual renewal of the action plan.
- An annual survey will be distributed to residents soliciting information on individual mitigation efforts on their own property (e.g., defensible space). Responses will be tallied and reviewed at the next Columbia County WUIFC meeting. Needed actions will be discussed and delegated.

This plan should become a working document that is shared by local, state, and federal agencies that will use it to accomplish common goals. An agreed-upon schedule for meeting to review accomplishments, solve problems, and plan for the future should extend beyond the scope of this plan. Without this follow up this plan will have limited value.
The Georgia Forestry Commission provides leadership, service, and education in the protection and conservation of Georgia’s forest resources. An Equal Opportunity Employer and Service Provider.
