Dear Directory User,

The Georgia Forestry Commission is pleased to bring you the *Georgia Secondary Wood-Using Industries Directory 2014*. The Directory is designed to serve as a reference for producers seeking to market their wood products and for wood users in locating suppliers.

The forest products industry remains a strong economic force in Georgia. Our latest study of the industry shows that for the second consecutive year, Georgia's forest industry provided more jobs for Georgians and more fuel for the state's economy than the previous year. Total economic activity supported by Georgia's forest industry increased four billion dollars to \$28.9 billion in 2012, which is a 15.9% increase from 2011 and the highest level since 2001. These activities supported the employment of 135,732 Georgians, an increase of 15% or 17,273 jobs.

Georgia's commercial forest totals more than 24 million acres and forest growth exceeds harvest by 41% each year. This forest should continue to supply solid wood and fiber to a strong forest industry for decades into the future. The Commission's staff is working to insure that Georgia firms invest in Georgia wood product manufacturing as globalization places increasingly competitive demands on the industry. Creating enhanced forest value by marketing Georgia's products through this Secondary Wood-Using Industries Directory is an important part of our mission.

The Georgia Forestry Commission invites new and existing Georgia forest product industries to be included in future editions of this directory by contacting us at 1-800-GA-TREES. I also invite your comments on how the Georgia Forestry Commission can better provide the right services to you, a valued partner in Georgia's forest industry.

Sincerely,

Robert D. Farris
State Forester

PREFACE

This publication is the 2014 directory of secondary manufacturers of forest products in Georgia. Companies listed were operating in 2013. It is a marketing guide to maximize global competitiveness of Georgia grown and manufactured wood products. The Directory can benefit persons or firms, both interstate and intrastate, seeking to buy or sell specific items. The Directory cites 1,081 secondary mills.

The information contained in this Directory is as up-to-date as possible. Data was collected during the second half of 2013 with publication in August 2014. A comprehensive effort was made to locate and interview all qualifying companies. The Georgia Forestry Commission would like to acknowledge the assistance provided by the Georgia Department of Economic Development in identifying companies for inclusion.

The classification of some manufacturers was difficult because of varied products or raw materials. In general, primary industries are those that use round timber, and secondary industries are those using partially manufactured wood, such as lumber or plywood, as raw material. A more detailed classification was made using the North American Industry Classification System (NAICS). This Directory focuses on secondary industries only.

The Directory includes an alphabetical listing of firms operating in Georgia. Information in this major listing includes name of company, physical address, telephone number, fax number, and email & website (if available), contact person and title and county of mill location. Additional information includes one or more major business classifications in which the company is engaged, species of wood or material used, products produced, certified wood products purchased and sold, including the type of wood certification system and products exported.

Appendix A is a listing of the North American Industry Classification System (NAICS) codes that were used in this Directory.

Appendix B lists mills by the North American Industry Classification System (NAICS) which describes major business types and related page number in the alphabetized company listing. In some situations, firms may be listed in multiple business types. For example, a cabinet firm may be listed in the furniture section, and similarly for other categories.

Appendix C lists mills by county of location with area code, telephone number, and related page number in the alphabetized company listing.

The Directory is available for download on the Georgia Forestry Commission website at www.gatrees.org/resources/directories/wood-using-industries/. In addition, the Wood Using Industries Online Directory, a searchable database of primary and secondary mills and the products they produce, can be found at the same site. Furthermore, a searchable, map-based, online directory of wood-using mills for the southeast U.S. can be found at www.forestproductslocator.org.

Inquiries about the Directory including corrections and/or updates to company listings should be sent to the publication author, Risher Willard, at the following address.

Acknowledgments

The Georgia Forestry Commission is grateful for the support it received on this project from the companies listed, for without this cooperation, it would not have been possible. Special thanks are due to Cassie Miles of the Georgia Forestry Commission's Forest Utilization Department for her efforts in contacting several thousand firms and populating the database which is the basis of this Directory. Acknowledgements would not be complete without the recognition of the technical assistance provided by Kassie Keck of the Georgia Forestry Commission's Communications Department, as well as State Forester Robert Farris in supporting the development of this Directory.

Alphabetical Listing

DISCLAIMER

The Directory is intended as a marketing guide to bring buyer and seller together where Georgia grown or manufactured products are involved. A comprehensive effort was made to locate and interview all qualifying companies; however, some have changed name, telephone, location or ownership. Omission of a firm is not intended as a reflection against it, nor is inclusion a recommendation. In no event shall the Georgia Forestry Commission be liable for any damages whatsoever (including, without limitation, damages for loss of business profits, interruption, loss of business information, or other pecuniary loss) arising out of the use of or inability to use this product, even if the Georgia Forestry Commission has been advised of the possibility of such damages.
