

PAPER TO PAPER

Paper products are great because they can be recycled. When we recycle something, we're not throwing it away and making more garbage. Instead, we're finding a way to use it again.

Recycled paper can be added to new wood to make "new" paper products. That way, we get the most out of the paper we use. And there's less garbage, too!

Copy the squares below onto the grid in the correct places.
Then color your picture.

Think About It:

The recycling symbol means something can be recycled or is made of recycled materials. Look for it on products you buy or use.
