

Levels of a Forest

Just as an apartment is made of many floors, the forest is made of many different levels or layers. The bottom layer is called the "Forest Floor." The next layer is the "Mid-Story," and the top layer is called the "Canopy." A forest has different animals and plants that live on each level in the same way different people live on the various floors of an apartment building.

HOW MANY DIFFERENT ANIMALS CAN YOU FIND IN THIS PICTURE?

Answer: 24 animals! 4 squirrels, 2 deer, 1 fox, 1 rabbit, 1 grasshopper, 1 bumblebee, 1 butterfly, 1 eagle, 4 hawks (1 adult + 3 babies in eggs), 1 woodpecker, 1 owl, 2 songbirds, and 1 bird catching 1 worm.
